

AR84

48KHZ REMOTE AUDIORACK

The AR84 is an 8 in 4 out 48kHz remote AudioRack.

AR84 can be connected from the Expander port of an AB168 or AR2412 remote AudioRack using the dSNAKE protocol.

dSNAKE is a Layer 2 ethernet protocol, so can be transported thru a VLAN or media converters.

AR84 is compatible with the Qu and SQ series.

Key Features

- 8 Analogue inputs
- 4 Analogue outputs
- dSNAKE audio protocol

Benefits

- Fully remote controllable
- 1U height
