

The smallest fog generator in the world.

a Look Solutions product

battery powered fog generator

programmable

can be easily build into costumes and props

made in Germany

The **Tiny FX** is the latest, modified version of the successful Tiny series.

The design and also some components have been changed:

Due to the installation of a smaller, efficient pump, dimensions and weight could be reduced again.

The fluid reservoir can be screwed directly into the machine. Thus, an external fluid tank and fluid tube are not necessary and the **Tiny FX** only has two components: machine and battery pack.

The Idea

In the field of special effects, equipment for theatre, musicals and movies, individual solutions for placing fog effects are often needed.

Until now, many great ideas have failed due to the size, lack of flexibility and price.

The Solution

The **Tiny FX** is called tiny, and its dimensions truly are tiny (L = 9.8 cm, W = 4.4 cm, H = 3.4 cm). In this small package, technology of outstanding performance has been realised.

The **Tiny FX** is a fog generator that fills the gap, due to its small size and its programmability.

- The generator

With the small dimensions and the light weight of only 180 grams, this little gadget can be easily built into backdrops, puppets, costumes and props.

The heart of the generator is a programmable micro-processor which controls the fog emission. State of the Art technology opens a wide field of applications to the user.

For some applications it will be useful to program in a fixed fog amount. This can be done directly at the machine. The programmed fog amount can easily be reproduced and/or changed.

A compact battery (L = 10.5 cm, W = 4.4 cm, H = 4.1 cm) supplies the **Tiny FX** with the 11.1 V supply. The small dimensions and the light weight of 200 grams ensures an easy hiding or installation.

The modular design of fog generator and battery pack ensure upmost flexibility for individual uses.

Because of an intelligent control mechanism the battery supplies energy only when necessary.

Thus the fog time is greatly increased compared to other battery powered machines.

- Control

The **Tiny FX** is triggered with a start button which is integrated into the lid of the machine.

Also you can trigger the generator with the supplied cable remote. The remote will be connected to the machine by using a mini-stereo-jack cable. As an option, you can also control the machine with a radio remote or via DMX 512 with a DMX-converter.

- Minimal fluid consumption

The fluid reservoir for the generator will be supplied ready to use and filled with Tiny-Fluid. The reservoir will be simply screwed into the machine.

The reservoirs can be refilled and therefor can be used several times.

The Tiny-Fluid ensures dense fog is produced with the lowest of fluid consumption (approx. 2.3 ml/min. at continuous output).

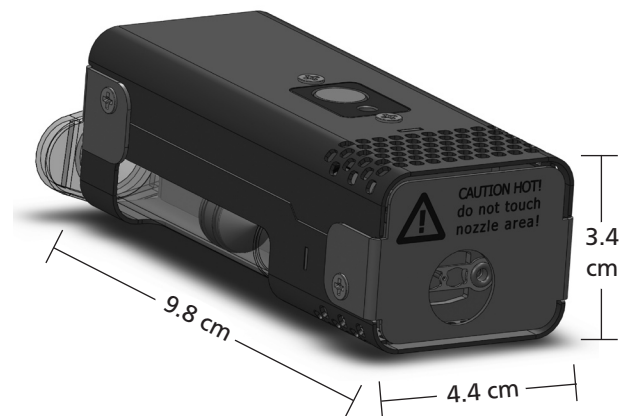

- Service

The vaporizer of the machine can be easily changed by the user on site.

Technical data

Procedure	Vaporizing fog generator
Power requirement	70 Watt
Voltage	11.1 V with battery pack
Warm up time	0,5 seconds
Fluid tank capacity	5 ml
Fluid consumption	2,3 ml/min. at cont. Output
Fogging time	programmable
Continuous output with battery pack	approx. 10 minutes
Control	Start button in the lid Cable remote Radio remote (option) DMX 512-converter (option) Timer (option)
Dimensions Tiny FX (L x B x H)	9.8 x 4.4 x 3.4 cm 3.8 x 1.7 x 1.3 in
Weight Tiny FX	180 g / 6.3 oz
Dimensions battery pack (L x B x H)	10.5 x 4.4 x 4.1 cm 4.1 x 1.7 x 1.6 in
Weight battery pack	200 g / 7 oz

Dimensions

Advantages

- Small dimensions and light weight enables an easily installation into costumes and props
- Battery supplies energy only when the fogging process is activated. Thus ensures an increased fog time and ready for operation time
- Warm up time less than 1 second
- Continuous output
- Fogging time programmable
- Control via start button, cable remote and as an option with radio remote, DMX-converter or timer
- Vaporizer can easily be changed if necessary
- Minimal fluid consumption (2,3 ml/min. at continuous output)
- Supplied in a case for transport and stocking
- Made in Germany

Package includes

- Tiny FX
- Battery pack 11.1 V
- Battery cable
- Charger
- Cable remote incl. cable
- 6 fluid reservoirs à 5 ml
- Refill set
- 250 ml Tiny-Fluid
- Case

Accessories

- Radio remote
- Duct adaptor
- Y-Splitter
- Silikon tube, Ø 15 mm
- Timeit, timer
- DMX-converter

Service

Based on the strong partnership with our manufacturer Look Solutions is able to provide a quick and easy service which guarantees the high quality of all products.
