WHY THIS PRODUCT WORKS BETTER THAN ANY OTHER PRODUCT

Our Anti-Vibration Devices use a proprietary Visco-Elastic Polymer that flows like a liquid under load. Combining this fast reacting high energy absorption with a near faultless long Memory, guarantees it will outlast any other material, including all one dimensional materials like Rubber or Springs that are often used in an attempt to cure vibration.

This combination of our Specially Designed Anti-Vibration Gasket and the 4 Anti-Isolation Grommets installed on the Camera's Mounting Plate are guaranteed to absorb and Isolate vibrations up to 30,000 Hertz
