AiRR Microphone Booms

Three models of lightweight boom stands, ranging up to a 6' tripod base with an 8' boom for a total height of 14'.

Perfect in studio environments for lead and background vocals, overhead applications as well as outdoor and location recording. They feature crank for smooth height adjustments, a long expandable boom arm, fast locking and unlocking of the boom angle, adjustable locking legs that can adapt to many surfaces, and removable three wheel tripod base with rubber feet fitted to each telescopic locking leg. A center hook is provided that can accommodate extra weight such as the included sandbags. There is also a boom hook for use of the smaller sandbag as an additional boom counterweight. Easy to break-down and transport and stows in a re-enforced gig-bag.
