

SENNHEISER 2000 IEM SERIES WIRELESS The EK2000IEM wireless bodypack receiver is extremely robust with a metal-reinforced battery cover and adaptive diversity for security. The earphone cable functions as a second antenna, significantly reducing the number of dropouts. SR2000 and SR2050 transmitters offer an intuitive menu, true diversity, and Ethernet connection to monitor and control your system remotely from a PC. With switching bandwidth of up to 75MHz, and adjustable transmission power (10/30/50/100mW), the transmitters of the 2000 series can be used in a particularly flexible manner. The 5-band graphic EQ allows you to individually adjust the sound within the transmission path.

SENNHEISER EVOLUTION IN-EAR WIRELESS Wireless monitor system with rackmountable transmitter, bodypack receiver, and earphones. Has an Ethernet port for connecting to the Wireless Systems Manager (WSM) software for control via computer, providing great monitoring and data management for multi-channel systems. The G3 in-ear system offers adaptive diversity for high reception quality, pilot tone squelch, auto frequency scan, enhanced AF frequency range, and wireless sync of receiver parameters from transmitter. Other features include user-friendly menu operation, illuminated graphic display, auto-lock function, HDX compander, 5-band graphic equalizer in the transmitter, and mute function for transmitter. The receiver features HiBoost, adjustable limiter, stereo/focus mode, and balance control.

SHURE PSM 200 SERIES IN-EAR MONITOR SYSTEMS

Available as a wired system or a UHF frequency-selectable system. The wireless version offers 8 selectable frequencies with 4 compatible in each system. The P2R Hybrid Bodypack Receiver can operate as either a mono wired receiver, a mono wireless receiver, or both at the same time. With a 1/4" jack on its side, the P2R can receive an incoming signal from an instrument, click track or mono mix and can also receive a wireless signal from the P2T transmitter. The P2T TransMixer offers 2 mic/line inputs so you can adjust your mix at the transmitter and ships with rack mounting hardware.

SHURE PSM 900 WIRELESS PERSONAL MONITOR SYSTEM

For the most demanding professional events, this system combines excellent audio quality, robust RF performance, a simple user interface, and an ultra-thin bodypack. Active RF Gain Control automatically reduces receiver sensitivity when an overload of RF signal is detected. The system consists of the compact P9RA bodypack receiver and half-rack single P9T wireless transmitter. The rechargeable P9RA receiver includes CueMode which allows users to audition up to 20 different monitor mixes on a single bodypack at the touch of a button. Scan and Sync technology offers analysis of the RF environment for interference and identifies available, compatible frequencies within seconds. In addition, the dedicated RF Mute feature gives users the ability to set up audio and RF parameters without transmitting. The SE425 sound isolating earphones feature enhanced sound signatures and premium dual speaker technology in a lightweight design, plus the cable is detachable.

SHURE PSM 1000 WIRELESS PERSONAL MONITORING SYSTEM

The PSM 1000 features 72MHz bandwidth (region dependent) with vastly reduced inter-modulation, front-end band filtering, and active gain control to deliver more channels on air with fewer dropouts. The system includes a Cue Mode (remotely audition up to 20 mixes), enhanced stereo encoder, audio reference companding, scan and sync, RF mute, MixMode (balance L/R output levels for a personal mix on each bodypack), and networked control via Wireless Workbench 6. The rechargeable battery system provides real-time data on power levels, charge history, and more. The full-rack dual transmitter with internal daisy-chaining power supply simplifies integration with live performance wireless systems. P10R bodypacks feature two antennas for the most effective signal preservation.

AKG IVM4500 IEM IN-EAR MONITORING SYSTEM

Offers true diversity, reference-quality audio, and unique signal-processing capabilities in a half-rack package. This UHF system provides a natural listening experience via integrated dbx compressor, EQ (with presets), and in-ear-optimized binaural room simulations. The enhanced frequency setup offers a display of free channels, preset groups, and quick frequency change function, allowing monitor engineers to easily adjust performance. Other features include a powerful headphone amplifier, ultra-linear frequency response, and dual mode for individual mixes. The optional HUB 4000Q allows for integration into HiQnet® systems.

AUDIO-TECHNICA M2/M3 WIRELESS IN-EAR MONITORING SYSTEMS

Common features include pilot tone to protect against RF interference, adjustable squelch, a defeat-able limiter, and a stereo receiver that allows the user to create and control his/her own mix on stage. Personal Mix Control offers volume and mix control of 2 independent signals at the receiver. Each system offers a stereo transmitter equipped with two line-level XLR/ 1/4" combo inputs. On M3 systems the M3T stereo transmitter also offers a headphone output that allows you to monitor transmitter inputs directly. The M2 systems have 100 selectable UHF channels, and are capable of having up to 10 simultaneous systems operating per frequency band. The M3 systems have 1321 selectable UHF channels with auto frequency scanning, and are capable of having up to 16 simultaneous systems operating per frequency band.

ORDERING INFO:	OPERATES IN THIS RANGE:

AM3	Ambient omni condenser lav mic with right-angled 1/8" connector for M2/M3 systems	99.00
ATW-A49S	Single UHF wide-band directional log periodic dipole array antenna, 440-900MHz, mounts to 5/8"-27 threads, includes 12ft cable	159.54
MCB4	IEM antenna combiner, allows up to 4 M3 transmitters to be combined onto single antenna, BNC type connections, also powers 4 transmitters, includes hardware, adapters	599.00

GALAXY AUDIO AS-1100 WIRELESS PERSONAL MONITOR

This 120-channel wireless system's receiver features an 80mW audio output, a 100mW headphone output, a backlit LCD display, volume control, a RF and AF indicator, a 4-bar battery life indicator, and runs on 2 AA batteries. The transmitter has 2 XLR/ 1/4" combo inputs, a RF output, transmits in stereo or mono, an LCD display, volume control, a headphone output with volume control and an antenna.

GALAXY AUDIO AS-1800 IN-EAR MONITOR SYSTEM

This UHF system offers "Mixed Mono Mode" which allows performers to adjust the balance of left and right audio signals for the creation of a personal monitor mix. The transmitter offers an easy-to-read LCD display, naming function, 640 selectable frequencies on 32 selectable channels, 30/100mW selectable output, monitor output and detachable BNC antenna. The true diversity receiver is loud enough for almost any venue with 150mW of power. Other receiver features include tough magnesium alloy construction, stereo/mono switch, squelch adjustment, auto-mute, button lock and backlit LCD frequency display. Earbud monitors included.

HEAR TECHNOLOGIES FREEDOM BACK™ WIRELESS IN-EAR SYSTEM

A high-quality UHF wireless stereo in-ear monitor system designed to replace loud, bulky stage monitors and allow movement around the stage. Includes a transmitter with antenna, wireless stereo receiver, carrying case, and rackmount kit with an extension cable for mounting the antenna on the front panel. The transmitter features 120 digitally-selectable UHF channels and up to 10 transmitters may be used in the same space (depending on local UHF interference). Other features are a stereo or mono switch on the rear of the transmitter, back-lit LCD display of frequency, audio level, group and channel, XLR and 1/4" combo input connectors, built-in automatic limiter, stereo headphone or in-ear monitor jack with volume control, and PAD switch attenuates signal by 12dB. The wireless stereo beltpack receiver features include back-lit LCD displays, stereo headphone or in-ear monitor jack with volume control, RF present LED, and includes batteries. Unlimited number of receivers may be used with one transmitter when on the same frequency.
