Ableton

ABLETON LIVE

Create ideas, make changes without stopping, and capture everything as you work. Live's Arrangement View is a familiar working space: time moves from left to right, while tracks are stacked vertically. But Live also features the revolutionary Session View: a unique sketchpad for improvising, playing and performing with musical ideas, without the constraints of the timeline. Freely and independently start and stop any number of audio or MIDI loops - everything stays in sync. Almost everything in Live works in real-time - add, reorder or remove devices, play with Live's flexible track routing and more - all without interrupting your creative flow.

Live 9 comes in 3 editions, all of which share the common features listed below. The Standard and Suite versions add additional features, instruments, packs and effects.

Features common to all editions of Live:

• Unique Session View for quick, intuitive composition, flexible performance and improvisation
• Multi-track recording up to 32-bit/192kHz
• Non-destructive editing with unlimited undo
• Powerful MIDI sequencing of software and hardware instruments
• Advanced warping and real-time time-stretching
• Unlimited Instruments, audio effects and MIDI effects per project
• Group tracks
• VST and Audio Unit support
• Time signature changes
• Multiple automation lanes
• Track Freeze
• Automatic plug-in delay compensation
• MIDI remote control instant mapping
• MIDI output to hardware synths
• MIDI clock/sync
• ReWire
• Multicore/multiprocessor support
• WAV, AIFF, MP3, Ogg Vorbis, FLAC file support
