V-R231-IMD-HSDI

MARSHALL ELECTRONICS IN-MONITOR DISPLAY-CAPABLE LCD MONITORS

Allows UMD (Under-Monitor Display) information and tallies to be displayed directly within the monitor. Available features include on-screen video time code, 3-color "Soft" Tallies, audio presence indicator and easy menu navigation. Integrates easily with existing Tally systems and controllers, while supporting Image Video, NVISION, TSL, and MEI protocols. All except the Quad Viewer monitors include HDS/SDI/SDI inputs and can be used as standalone displays with HDS/SDI loop-through. Quad Viewer models offer full-screen mode for video and DVI and quad-split mode (via built-in HD quad splitter) which is scaled to fit onscreen in the highest resolution. The Quad Viewer models have (4) independent HDS/SDI inputs, (1) DVI input, field-upgradeable firmware, and an RS422/485 port with pass-through. Dual Link/Waveform models feature 10-bit video path with 3G capable monitors and can display live video, audio bars, waveform and vectorscope in quad-view mode. They also have (2) 3G/HD/SDI inputs, Dual Link, a DVI input, RS485 firmware updating, and closed captioning (CEA-608-B, CEA-708-B). The NCB-1005 allows connected IMD monitors to be controlled by PC via Ethernet.

PANASONIC INTERACTIVE PLASMA DISPLAYS

These 1080p plasma displays combine a beautiful picture with seamless whiteboard-like writing functionality. They support multiple writing inputs both accurately and simultaneously with different colors and thicknesses. Displays wireless PC or tablet data for meetings and wireless transmission from iOS devices diversifies teaching materials. Screens are large with a wide viewing angle for clear presentations. The electronic pen system removes the need for a touch overlay calibration and detects the pen 60 times per second for a lag free writing experience.

SAMSUNG PROFESSIONAL EDGE LIT LED DISPLAYS

These ultra-slim displays have an extremely narrow bezel that makes them perfect for video wall and digital signage applications. Full HD 1080p, 450 nits brightness and a 5000:1 contrast ratio combine for sharp, detail-rich images and easily legible type. Offers USB cloning, auto source switching and recovery, video wall functionality (10x10), image rotation and a built-in media player. Series includes VGA, DVI-D, (2) HDMI, DisplayPort 1.2, component, USB, RJ45, RS232C, stereo mini jack and TV inputs with RS232C, DisplayPort 1.2 (Loop-out) and stereo mini outputs.

SHARP PROFESSIONAL LED LCD DISPLAYS

Sharp's PN-E Series portrays uniform brightness, enhanced reliability and greater legibility of text. Engineered for 24/7 commercial use, these displays excel in digital signage applications and even include stereo speakers, eliminating the need for an external audio system. Standard I/O includes HDMI, VGA and stereo audio inputs, stereo audio line-output and RS-232C input/output. The optional PN-ZB01 expansion board adds DVI-D, 5-BNC RGB, component, S-Video, composite, stereo audio, RJ45 LAN and stereo speaker output connections. Optional PN-TPC1 signage controller permits all-in-one digital signage package.

4K ULTRA HD 3D LED DISPLAYS

See more than ever before with Ultra HD (3,840x2160 pixels), four times the resolution of Full HD (1920x1080). The new 4K X-Reality™ PRO chip enhances and upscales HD (and lower resolution) images by analyzing and refining images with beautifully natural detail and astounding color. Dynamic Edge LED backlighting with local dimming boosts contrast in just the right areas, rather than illuminating the entire screen. A built-in front-facing speaker system offers 65W of power and simulated 5.1 surround sound. Built-in WiFi allow access to services like Netflix®, YouTube® and Hulu Plus™ as well as remote control via smartphones and tablets. Inputs include (4) HDMI, component, composite, analog audio, (3) USB, RF, Ethernet and RS232C. Outputs include digital optical audio, analog audio and headphone out. Supports 3D picture and includes (4) 3D glasses.

SONY PVM SERIES OLED PROFESSIONAL VIDEO MONITOR

The PVM series uses an OLED (Organic Light Emitting Diode) panel, which creates true blacks and higher contrast than LCDs. Picture quality is excellent both indoors and outdoors, plus the new panels allows for off-axis viewing without color shift. Supports broadcast standards SMPTE-C, EBU and ITU-R BT.709, with resolutions from NTSC/PAL to 1080p60. The PVM Series monitors come standard with two 3G/HD/SD-SDI inputs, an HDMI input, composite input, internal waveform monitor and AC power adapter. The PVM-741 includes 1/4" and 3/8" holes for camera mounting.
