## APOLLO SMART COLOR® SCROLLERS

These scrollers provide reliable, accurate performance in a variety of applications - from theater to corporate events to live concerts. Available in 3 sizes with various mounting plate options for use with a variety of fixtures. Power supplies, standard and custom gel strings, and cables are also available. Durable lightweight aluminum construction provides application flexibility. They offer large apertures to ensure maximum beam angles and light output. Precision motor bearings allow for whisper-quiet operation. Other standard features include state-of-the-art digital circuitry with rotary DMX addressing, an automatic scrolling mode to continuously scroll or frame-by-frame step through each color at various speeds without the need for a lighting console, and remote fan control. Each Smart Color® scroller comes with pre-installed Apollo Gel Shield to extend gel string life. A mounting plate and gel-string of your choice are pre-loaded. Please call for a complete list of choices. A universal mounting plate that adjusts between 5.75-10" is available for model 7.25.

## ETC SMARTBARS™

Need to distribute dimmers throughout your venue? Put your dimming wherever you need it with ETC's new SmartBar. Available in 3 configurations, SmartBar provides an integrated dimming and fixture mounting solution for compact low-power applications. Depending on size, many SmartBars can be connected to a standard 20A wall outlet for "anywhere dimming." SmartBar is ideal for rentals, industrials or even small touring productions. It is fully digital, with operational and programming features similar to the SmartPack™ – presets, sequences (chases), choice of dimmer curves – as well as many new features. Available as 4ch x 6 amps per channel, 2ch x 10 amps per channel, and 6ch x 10 amps per channel bars with your choice of output connectors. Includes programmable functions such as min/max levels, fadetimes, non-dim operation, dimmer curves, back-up settings, and stand-alone operation with built-in chase sequences. Includes 5-pin XLR DMX In and Thru Connectors and integrated fixture support.

*Supplied with c-clamp and color frame*

## ETC ION-1000 THEATRICAL LIGHTING CONTROLLER

With the ease, power and operational style of Eos in a small, affordable package, Ion's small footprint (only 19" wide) is the perfect solution for space-challenged environments and small venues. Providing fully integrated control of conventional and moving lights, Ion packs a punch. It sports a generous programming keypad, dedicated encoders for non-intensity parameter control, a grand master and blackout button, as well as a master split fader. For more hands-on control, Ion hosts up to 6 USB fader wings available separately (the 1x20, 2x10 and 2x20) for a total of 200 additional submasters with paging controls. The desk can support 1 or 2 external high-resolution DVI monitors, which can also be touchscreens.

- Dedicated master playback fader pair
- 4 x 1000 palettes (Intensity, Focus, Color, Beam)
- 4 pageable encoders
- Offline programming software
- Data import from ETC Obsession, Expression, Emphasis and Strand Show files
- Integral LCD for softkeys and non-intensity parameter control
- 2 x DMX512 outputs, RDM ready
- ETCNet2 and Net3 native
- Hard disk memory and USB compatible external storage
- MIDI in/out (additional time code functions via external gateways)
- Multipurpose USB bus (printer, mouse, keyboard, touchscreens, flash drivers)

## ETC SMARTFADE® ML

The new super-compact moving-light control console, with professional features but without the traditional price tag. SmartFade ML provides professional features like palettes, parameter "fan" and built-in dynamic effects with an easy-to-learn direct-access style of operation. Has a capacity for up to 24 moving lights and an additional 48 intensity channels (dimmers), and the ability to patch to 2 complete universes of DMX512 (1,024 outputs), giving you all the control you need for smaller rigs. Its color-coded backlit keys make it easy to operate in the dark, without requiring additional worklights. The keys and built-in LCD displays also provide status feedback without the need for an external monitor.

## JANDS VISTA LIGHTING CONTROLS

Imagine if you could design your lightshow the way you see it—visually. Imagine if you didn't have to convert your mind's eye into a complex series of numbers, then spend ages punching them in. Imagine if you could create lighting effects the way you'd create a painting—with broad brush strokes. Well finally someone has built a console with you in mind. A console that removes all the hassle and tedious work of programming. The Vista is fundamentally different from existing consoles in 3 major ways - the introduction of a 'timeline' that gives you the complete picture and total control of your lighting events, a totally new approach to the user interface that makes the Vista incredibly easy to use and a generic fixture model that takes all the hassle out of changing fixtures. The Vista is available as a full-featured console, or as a software option with a variety of control surfaces and channel counts.

| ITEM | DESCRIPTION | LIST |
|---|---|---|
| JAVISTAT4-V2 | Console with 30 playbacks | 33893.00 |

## Roland

**ROLAND FANTOM G WORKSTATIONS** This Series offers 256MB standard of wave memory and 128-voice max polyphony. Each unit houses a fully functional sequencer section that includes up to 128 total tracks (24 audio), and utilizes both real-time input & step recording methods. Designed to fully integrate MIDI parts and audio tracks together with a large easy to read 8.5" VGA backlit TFT LCD display. There are 2 ARX series expansion card slots, up to 1,664+256 (GM2) preset patches, plus an extensive rhythm preset section and user preset memory locations. The on-board sampler comes with 32MB of standard memory yielding up to 180 seconds of stereo 16bit, 44.1kHz sampling. When sampling memory is expanded to the maximum of 544MB, up to 54 minutes of stereo sampling is available. It also has an extensive effects engine where a 16-part multi-timbre mode up to 22 effect routings can be used simultaneously. Create complex setups with 16 insert effects per patch, plus global reverbs & choruses. Other features include combo XLR and TRS connections, phantom power for condenser mics, 2 control pedal jacks, USB terminal (for file transfer and Audio/MIDI), Hi-Z input for guitar or bass, and a line input.

## YAMAHA

**YAMAHA NP30 ULTRA PORTABLE DIGITAL PIANO** A 76-note, 10-voice portable grand digital piano that weighs only 12 pounds due to its ultra-slim design. It operates on 6AA cells or via the included PA5D power supply. The keyboard bed features a graded soft-touch action (technically non-weighted), but brings different levels of resistance without the weight of moving hammers. The result is a very playable action that will appeal to pianists looking for a portable solution. It features a built-in metronome with multiple time signatures to choose from (3/4,4/4,6/8). A numeric key function also lets you set the exact tempo you need. Other features include 32-note polyphony, 4 types of reverb, AWM stereo quality piano samples, and the ability to layer 2 voices upon each other (dual voice mode).

MOTIF-XS6

**YAMAHA MOTIF XS SERIES** The MOTIF XS series features a 355 MB wave ROM library standard. A single voice can have up to 8 separate sound elements. All models have 128 voices of polyphony, pitch bend & mod wheels, ribbon controller, and 8 each assignable sliders and knobs. It has a new Expanded Articulation (XA) tone generation system which allows more accurate recreations of performances such as legato, staccato & key release often used on acoustic instruments, but unheard of on most electronic keyboards. A staggering 6,000 apreggio phrases are onboard, and you can have 4 different instances running simultaneously. The sampler is expandable to 1GB of RAM (none supplied standard). There are a variety of ports onboard including USB (to host & to device), MIDI in/out/thru, independent assignable outs on 1/4", A/D inputs (for sampling), S/PDIF out, and an Ethernet port. The MOTIF XS8 adds an IEEE1394 port. All models come with Cubase AI software which may be upgraded to Cubase 4.

GIGLIGHT™

**GIGLIGHTS GL1AND SGL MUSIC STAND LIGHTS** The GL1 GigLight produces a bright, wide-beam that lights up 2 full pages of music with 4x more light than the typical battery-operated clip-on light. It uses PowerBright LED technology, delivering full-spectrum, daylight-color temperature light. The high-contrast, low-glare illumination makes notes stand out and reduces eyestrain. A padded spring clip enables it to easily attach to the top of wire folding stands or solid back stands. The lamp head can be positioned out and over the music using an adjustable extension arm. It folds up small for easy carrying in a pocket, purse or accessory bag, and weighs just 10oz with batteries. The SGL Super GigLight model utilizes an advanced chip making it more powerful and more efficient, producing 4x more light than the GL1. SGL comes complete with a soft carry case and 4 AA batteries.

| ITEM | DESCRIPTION | LIST |
