The Robin®MMX is a new technology discharge fixture that has similar light output to most existing 1200 W luminaires. The unit is based on the all new Robin advanced technology design that provides Brighter, more efficient, physically lighter and smaller fixtures than previously possible. The MMX includes the Robe exclusive Hot-Spot lamp control feature that allows remote adjustment of flat beam uniformity or power beam hot-spot. Key feature of the MMX is the "Dual Graphics Wheel" – 2 fully controllable contra-rotating plates that can be positioned anywhere across the light path to produce unique visual effects.

Dual Graphic Wheel

Astonishing artistic animations and effect are possible to achieve thanks to the Dual Graphic Wheel. By it's unique design it allows creation of interesting Kaleidoscopic effects, as well as effect like fire, water, sky and transitions with morphing through several focusing planes. The wheel also allows movement from side to side (patent pending). There are one standard and one optional design of Dual Graphic Wheel for more creative possibilities.
