

Configuration:

LA-303 Multi-Lingual
Assistive Listening
Notification Sign

Product Overview:

An important part of assistive listening compliance is signage identifying the availability of assistive listening devices. Venues are required to post signs with the international symbol of access for hearing loss to inform their guests that an assistive listening system is available.

Assistive listening standards mandates that the sign(s) must be posted correctly at each of the entry points of a facility with an assistive listening system.

The LA-303 is made of dense foam core for easy wall mounting using the foam tape. It can also be placed on a table using the included double wing easel. The LA-303 provides notification in English, French and Spanish.

Highlights:

- Informs people that assistive listening devices are available
- Meets mandatory assistive listening requirements for signage

Includes:

- One (1) LA-303 Multi-Lingual Assistive Listening Notification Sign
- One (1) Double Wing Easel
- One (1) Instruction Sheet
