

SHURE

VPH LONG WIRED MICROPHONE HANDLE

**FLEXIBLE
BROADCAST
CONTROL.**

ON CAMERA. ON AIR.

From the stadium to the red carpet, live reporting demands the best from you and your equipment. Shure VPH delivers an innovative, flexible broadcast microphone solution engineered just for you.

VPH is a wired microphone handle that lets you decide how each interview should sound. Choose from a wide variety of high-quality Shure wireless interchangeable capsules that offer different polar patterns and sonic characteristics. Every game and live event provides unique challenges and opportunities – shouldn't your interview microphone be uniquely equal to the task? With a handle long enough to accommodate network broadcast flags, VPH gives you plenty of reach to capture each and every quote.

COMPATIBILITY

All Shure RPW cartridges* | Shure UHF Accessory Mute Switch (UAMS/BK) | Shure WA653 Flag Extension Kit

RPW124 VP68

RPW112 SM58

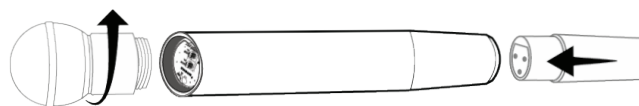

RPW174 KSM8

*NOTE: VPH requires 11-52VDC phantom power for use with all RPW cartridges

HOW IT WORKS

To use, simply attach an RPW microphone cartridge to the threaded end of the handle and connect an XLR cable to the tapered end (both are sold separately).

FEATURES & BENEFITS

Interchangeable microphone cartridge design allows you to match the right microphone cartridge with each situation's need

Wide range of high-quality Shure RPW interchangeable microphone cartridges from which to choose (various polar patterns and sonic characteristics)

Long handle accommodates network broadcast flags
