

Mic Stand Shaft with Lower Rocker and M20

MSS8412 / 13159

ON-STAGE ORIGINAL M20 THREADED

Features and Benefits

The On-Stage M20 series of modular components - bases, shafts, booms and more - puts the power of stage and studio customization in your hands, right where it belongs. Designed for quick, conveniently reliable adaption, the M20 line features all manner of bases - from tripods for vocals to hexagonal heavyweights for telescoped miking - as well as shafts that accommodate a world of flexible connectivity. Naturally, all feature the precise machining and finest associated steel and aluminum powder-coated metals appropriate for their specific application.
