1. GETTING STARTED

What's Included?

- 1 x Torrent™ Keyframe 600
- 1 x Power Cord
- 2 x Mounting Brackets
- 1 x User Manual
- 1 x ATA Spec Road Case

Unpacking Instructions

Congratulations on purchasing Torrent™ Keyframe 600, professional framing spot fixture. Now that you've got your Torrent™ Keyframe 600, you should carefully unpack it and check the contents to ensure that all parts are present and in good condition. If anything looks as if it has been damaged in transit, notify the shipper and keep any packing material for inspection. If a fixture must be returned to the factory, it is important that the fixture be returned in its original packaged condition.

Powering Up!

All fixtures must be powered directly off a switched circuit and **cannot be run off a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel is used solely for a 0% to 100% switch.**

Warning! All fixtures must be connected to circuits with a suitable Ground (Earthing).

Getting A Hold Of Us

If something happens to go wrong, visit blizzardpro.com/support and open a support ticket. We'll be happy to help, honest.

Safety Instructions

Please read these instructions carefully. They include important information about the installation, usage and maintenance of this product.

- Please keep this User Guide for future use. If you sell the unit to someone else, be sure that they also receive this User Guide.
- ALWAYS make sure that you are connecting to the proper voltage, and that the line voltage you are connecting to is not higher than that stated on the decal or rear panel of the fixture.
- This product is intended for indoor use only.
- To prevent risk of fire or shock, do not expose fixture to rain or moisture.
- Make sure there are no flammable materials close to the unit while operating.
- The unit must be installed in a location with adequate ventilation, at least 20in (50cm) from adjacent surfaces. Be sure that no ventilation slots are blocked.
- ALWAYS disconnect from the power source before servicing or replacing fuse and be sure to replace with same fuse size and type.
- ALWAYS secure fixture using a safety chain. NEVER carry the fixture by its head. Use its carrying handles.
- DO NOT operate at ambient temperatures higher than 104°F (40°C).
- In the event of a serious operating problem, stop using the unit immediately. NEVER try to repair the unit by yourself. Repairs carried out by unskilled people can lead to damage or malfunction. Please contact the nearest authorized technical assistance center. Always use the same type spare parts.
- NEVER connect the device to a dimmer pack.
- Make sure the power cord is never crimped or damaged.
- Never disconnect the power cord by pulling or tugging on the cord.
- Avoid direct eye exposure to the light source while it is on.

Caution! With the exception of removing the covers for general maintenance and cleaning as outlined in this manual, there are no user serviceable parts inside the unit. Do not open the housing or attempt any repairs yourself. In the unlikely event your unit may require service, please open a support ticket at www.blizzardpro.com/support.

2. MEET THE TORRENT™ KEYFRAME 600

Main Features

- 600W, 6500K white LED light source
- 4 blade framing shutter system with rotation (+/- 45°)
- Rotating gobo wheel with 6 gobos (2 glass & 4 metal) +open
- Fixed gobo wheel with 8 metal gobos +open
- 6 color wheel + white (open)
- CMY + CTO color mixing system
- Variable CRI filter (71 ~ 91)
- P/T ranges: 540°, 360°, 180° pan / 270°, 180°, 90° tilt
- 16-bit smooth dimming + 4 selectable dimming curves
- 7-40° linear motorized zoom
- Frost, iris, and continuous animation effect wheel
- 3-facet circular + 4-facet linear rotating prisms
- 0-25Hz strobe + variable, pulse, and random effects
- Flicker-free + 6 PWM setting options
- 8-16 bit focus (1M to infinite + auto)
- 6-button control panel with touchscreen LCD display
- Protocol: USITT DMX-512, Art-Net, sACN, RDM

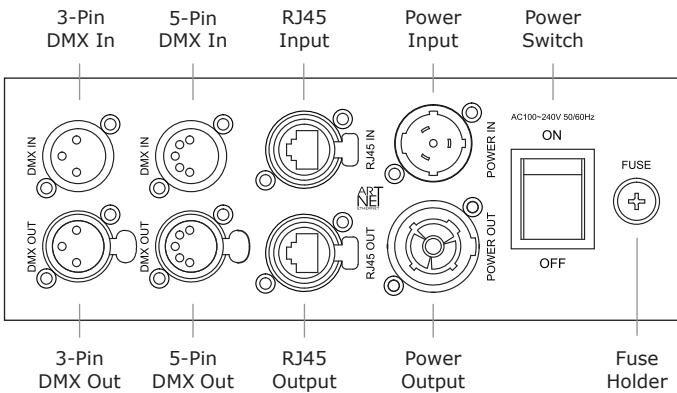

DMX Quick Reference (36/52-Channel Modes)

Torrent™ Keyframe 600 Pin-Up Picture

The Rear Connections

3. SETUP

Before replacing a fuse, disconnect the power cord. ALWAYS replace with the same type and rating of fuse.

Fuse Replacement

Remove the fuse holder from of its housing. Then take out the damaged fuse from its holder and replace with exact same type of fuse. Reattach the fuse holder, and then reconnect power.

Connecting A Bunch of Torrent Keyframe 600's

This fixture can receive DMX, Art-Net, or sCAN signals. It is equipped with both 3-pin and 5-pin DMX input/output, and RJ45 input/output connections.

DMX Connections

To link fixtures together via DMX, you'll need data cables. You should use data-grade cables that can carry a high quality signal and are less prone to electromagnetic interference.

Connect your controller to the DMX input of the first fixture, and then the DMX output of the first fixture to the DMX input of the next in line. Continue to connect the outputs to the inputs of any following fixtures until all are connected together. Up to 32 fixtures, or 1,000 feet of total cable length (whichever comes first) can be connected.

Note: We recommended the use of a DMX terminator on the last fixture.

Art-Net™ and sACN

This fixture is equipped with an RJ45 input socket for Ethernet input connection and RJ45 output socket for daisy chaining fixtures.

Art-Net™ communication protocol is a 10 Base T Ethernet protocol based on the TCP/IP. Its purpose is to allow transfer of large amounts of DMX-512 data over a wide area using standard network technology.

To configure the fixture network settings for use with Art-Net™ or sACN, navigate the main menu to reach Network Setup where you can adjust the IP Mode (Manual, DHCP, or Static), Universe, IP, and the SubMask settings (see Control Panel Menu Structure, p.11).

Mounting Points

Overhead mounting requires extensive experience, which includes calculating working load limits, knowledge of the installation material being used, and periodic safety inspection of all installation material and the fixture. If you lack these qualifications, do not attempt the installation yourself.

This unit can be mounted upside down, or upright on a flat level surface. Due to the inertia of the fixture when it moves and its weight, sideways mounting is not recommended.

Be sure the fixture is kept at least 12m (40ft) away from any flammable materials, and always install a safety cable as a measure to prevent accidental damage and/or injury if the clamps fail.

Caution!

Please be aware, you should have a qualified electrician performing all of your electrical connection needs.

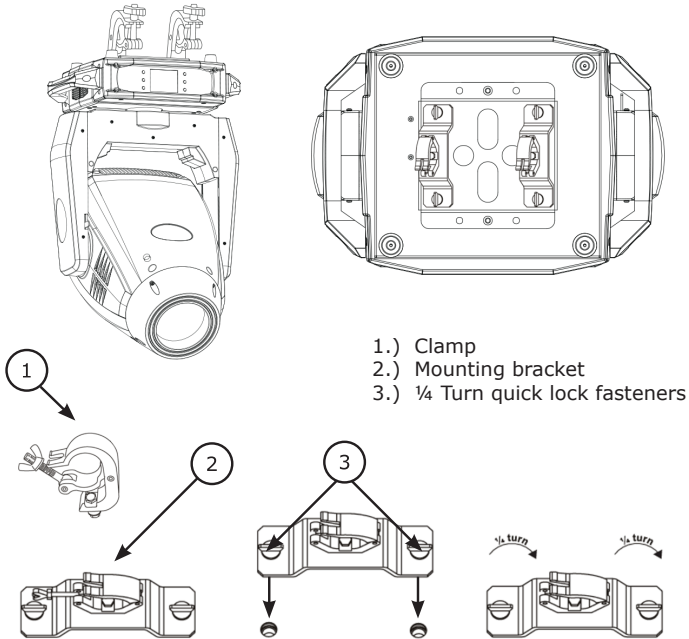

Be sure to complete all rigging and installation procedures before connecting the main power cord to the appropriate wall outlet.

Instead of sideways mounting, you may consider hanging the fixture vertically on an sidearm rated for at least 200 lbs.

Clamp Mounting

This fixture provides a mounting bracket assembly that secures the bottom base, mounting brackets, and safety cable rigging point together. When mounting to truss, be sure to use an appropriately rated clamp fitted through the center hole of the mounting bracket.

Securing the Fixture

Regardless of the rigging option you choose for your fixtures, always be sure to secure them with a safety cable. Be sure to use the designated rigging point found on the underside of the base assembly for the safety cable.

1. Attach clamps to both brackets through the hole in the bracket.
2. Fasten the mounting brackets to the base by inserting the quick-lock fasteners into the holes, and turn them clockwise to tighten.
3. Hang the fixture using the clamps and tighten. Fasten a safety cable through the bottom of the base, and over the support.

4. OPERATING ADJUSTMENTS

The Control Panel

All the features and different modes possible with Torrent™ Keyframe 600 can be accessed by using the control panel on the front of the fixture. It has a touchscreen display, and 6 control buttons. Navigate the display by using the buttons, or touching the desired menu option on the display. The touchscreen can be calibrated and locked in the settings options in the menu.

<UP>

Scrolls through menu items and numbers in ascending order.

<LEFT>

Navigates through menu items moving towards the left.

<MENU>

Is used to navigate to the previous higher-level menu item.

<ENTER>

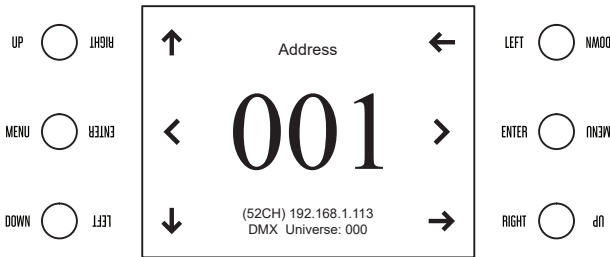

Is used to select and confirm/store the current selection.

<DOWN>

Scrolls through menu items and numbers in descending order.

<RIGHT>

Navigates through menu items moving towards the right.

The control panel LCD display shows the menu items you select from the menu map on page #11. When a menu function is selected, the display will immediately show the first available options for the selected menu function. To select a menu item, press **<ENTER>**.

Use the touchscreen icons, or the **<UP>**, **<DOWN>**, **<LEFT>**, and **<RIGHT>** buttons to navigate the menu options. Press **<ENTER>** to select the menu function currently displayed, or to enable a menu option. To return to the previous option or menu without changing the value, press the **<MENU>** button.

Note: The screen invert settings of **NO/YES** or **AUTO** can be adjusted by navigating to **Settings > Screen Reverse**.

Gobo Replacement

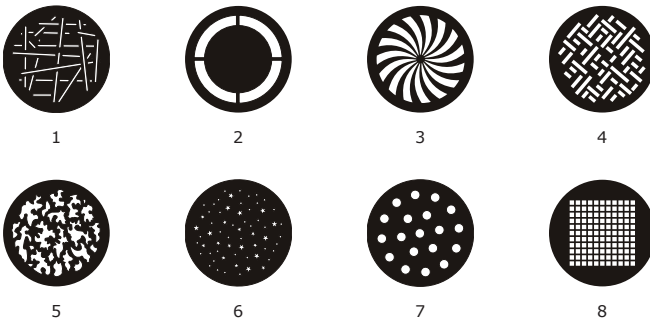

1. Remove the gobo cover by removing the four screws on the top of the fixture head.
2. Remove the slot-n-lock gobo from the wheel by lifting up slightly and sliding it out.
3. Using a small tool, pry the tension ring from the gobo holder.
4. Remove the old gobo, insert the new gobo, and replace using the reverse steps.

Rotating Gobos

Static Gobos

Color Wheel

1. Open
2. Red
3. Green
4. Blue
5. Yellow
6. Orange
7. Magenta
8. CRI filter

CRI = 71 (91 with filter)

Animation Wheel

When used in conjunction with focus, the radial animation wheel can create soft textures and depth within the wash field, or it can add sharp animated projections & mid-air beam effects.

Dimmer Modes

Allows users to set the fixture to use 1 of 4 dimming curve settings for smoother (and slower) dimming capabilities.

Fault Detection

If a problem is detected, the following error codes may be displayed. If an issue persists after performing a reset, visit www.blizzardpro.com/support to open a support ticket.

Code	Description	Code	Description
Focus	Focus Fault	MAGENTA	CMY Red Fault

Color	Color Wheel Fault	LED_HOT	LED Overheat Fault
Iris	IRIS Fault	BladeR	Framing System Rotation Fault
CYAN	CMY Cyan Fault	--	--

5. APPENDIX

Keeping Your Torrent™ Keyframe 600 As Good As New

The fixture you've received is a rugged, tough piece of pro lighting equipment, and as long as you take care of it, it will take care of you. That said, you'll need to take care of it if you want it to operate as designed. You should keep the fixture clean, especially if you are using it in an environment with a lot of dust, fog, haze, wild animals, wild teenagers or spilled drinks.

Cleaning the optics routinely with a suitable glass cleaner will greatly improve the quality of light output. Keeping the fans free of dust and debris will keep the fixture running cool and prevent damage from overheating.

Use a new microfiber rag to gently clean your lenses (paper towels and cotton towels will scratch them). To clean the fans, gently brush them with an eyelash brush and vacuum up any leftover debris - and make sure to hold the fans so they do not spin when vacuuming. *Do not use compressed air, this will push the dirt further into your fixture.

In transit, keep your fixtures in cases. You wouldn't throw a prized guitar, drumset, or other piece of expensive gear into a gear trailer without a case, and similarly, you shouldn't even think about doing it with your shiny new fixtures.

Returns (Gasp!)

We've taken a lot of precautions to make sure you never even have to worry about sending a defective unit back, or sending a unit in for service. But, like any complex piece of equipment designed and built by humans, once in a while, something doesn't go as planned. If you find yourself with a fixture that isn't behaving like a good little fixture should, you'll need to obtain a Return Authorization (RA).

Don't worry, this is easy. Just visit www.blizzardpro.com/support and open a support ticket, and we'll issue you an RA. Then, you'll need to send the unit to us using a trackable, pre-paid freight method. We suggest using USPS Priority or UPS. Make sure you carefully pack the fixture for transit, and whenever possible, use the original box & packing for shipping.

When returning your fixture for service, be sure to include the following:

- 1.) Your contact information (Name, Address, Phone Number, Email address).
- 2.) The RA# issued to you
- 3.) A brief description of the problem/symptoms.

We will, at our discretion, repair or replace the fixture. Please remember that any shipping damage which occurs in transit to us is the customer's responsibility, so pack it well!

Shipping Issues

Damage incurred in shipping is the responsibility of the shipper, and must be reported to the carrier immediately upon receipt of the items. Claims must be made within seven (7) days of receipt.

Tech Specs!

Weight & Dimensions	
Width	17.2 inches (435.5 mm)
Depth	11.6 inches (293 mm)
Height	29.7 inches (754 mm)
Weight	71.6 lbs. (32.5kg)
Power	
Operating Voltage	100V-240VAC, 50-60Hz
Power Consumption	930W, 8.49A, PF: .99
Fuse	10A, 250V
Light Source	
LED	600W white LED light source
Color Temperature	6500K
CRI	Variable (71 ~ 91)
Optical	
Beam Angle	7°- 40° beam angle
Gobo Size	27mm outer, 22mm inner, 1.2mm thickness
Thermal	
Max. Operating Temp.	104 degrees F (40 degrees C) ambient
Movement Range	
Pan	540°, 360°, 180° (8-16 bit resolution)
Tilt	270°, 180°, 90° (8-16 bit resolution)
Control	
Protocol	USITT DMX-512, Art-Net, sACN, RDM
Modes/Personalities	36/52-channel modes
Data	3/5-pin XLR in/out
Warranty	2-year limited warranty, does not cover malfunction caused by damage to LEDs.

Troubleshooting

Symptom	Solution
Fixture Auto-Shut Off	Check the fan in the fixture. If it is stopped or moving slower than normal, the unit may have shut itself off due to high heat. This is to protect the fixture from overheating. Clear the fan of obstructions, or return the unit for service.
Beam is Dim	Check optical system and clean excess dust/grime.
No Power	Check fuse, AC cord and circuit for malfunction.
Blown Fuse	Check AC cord and circuit for damage, verify that moving parts are not restricted and that unit's ventilation is not obstructed
Slow Movement	Check that speed channels are set appropriately.
Fixture Not Responding / Responding Erratically	Make sure all connectors are seated properly and securely. Use Only DMX Cables. Install a Terminator. Check all cables for defects. Reset fixture(s).

Dimensional Drawings

Photometric Data

Distance:	3m	5m	7m	9m
7° beam dia.	1.3' (38 cm)	2.1' (63 cm)	2.9' (89 cm)	2.9' (90 cm)
40° beam dia.	7.1' (216 cm)	11.9' (360 cm)	16.6' (504 cm)	21.3' (648 cm)

Luminous Intensity:

Beam	3m lux	3m fc	5m lux	5m fc	7m lux	7m fc	9m lux	9m fc
7°	84,545	7,854.5	29,165	2,709.6	14,705	1,366.2	8,564	795.7
40°	6,282	583.7	2,319	215.5	1,197	111.2	734	68.2

**Enjoy your product!
Our sincerest thanks for your purchase!
