Designed for unparalleled meeting experiences
and more beautiful spaces.

Infiniti™ Meeting Tables

Salamander Designs goes to infinity and beyond with the Infiniti™ Table series that is exclusively made to provide complete, unmatched video conferences and meeting experiences. A striking series of 6-to-14-person workplace tables, Infiniti offers innovative, trapezoid shapes made to optimize today's conferencing so that all participants can be seen, heard and fully engage – no matter where they are located. Featuring museum-quality design and artful styling, there are no other conference tables like these on the market.

**Designed for Webex
Room Panorama**

Born of a partnership
between Salamander
+ Cisco

An Ergonomically, Thoughtfully Designed Meeting Space.

Meticulously designed and fabricated, the geometric table shape assures that everyone seated at the table can see, hear and engage as well as be seen, heard and feel fully part of the interaction.

A Cut Above in Design + Materials.

Supported by an exclusive, sculpted steel pedestal base with an extruded aluminum frame system, they can accommodate any unified communications (UC) system and AV technology. The cable infrastructure runs along the entire length of the table, and top to bottom where the pedestal reaches the floor. Yet no one will ever know. The dove gray surface finish is also optimized for video conferencing to reduce glare and keep focus on vital human interaction. Other premium details include a 3-layer edge and sizes to accommodate small to large groups.

- Extruded aluminum, ladder frame in a satin anodized finish
- Cable routing from base of front or rear pedestal and fully along the table rail frame from end to end
- Floor coring for cable up and into the pedestals.
Rear pedestal has a cable access panel for management

Infiniti Table Surfaces + Edges

The tabletop surface color and material has been optimized for video conferencing and offers a visually interesting, yet simple top with a unique 3-layer edge detail.

Surface + Edges

Top surface is a matte, fingerprint resistant, high-pressure laminate in a dove gray color approved by Cisco for optimal light reflectivity and coloration.

Dove Gray

Natural Oak

- Center in black, solid surface that provides edge protection and detail
- Bottom edge trim options: Natural Oak or Dove Gray match top surface
- Custom finishes possible

Shapes + Sizes

Organic Trapezoidal shape is precision engineered to provide the ideal user experience for video conferencing, no matter where participants are located.
