

50W LED Simulated Water Effect

The Eliminator Lighting Aqua LED 2 is a multi-colored simulated water flowing effect with a white 50W COB LED source. The unit produces almost no heat, requires very little power (75W max) and can be used for an extensive amount of time, and with little to no maintained, due to its long-life LED.

The Aqua LED 2 has an on/off switch on the rear panel that allows the color wheel to rotate or stay on one color. There's no end to applications for the Aqua LED 2. Water flowing effects can add a unique visual dimension to nightclubs, bars, restaurants, shows, events, stage productions, museums, performances, and even displays and special events. The Aqua LED 2 works great with or without the use of fog
