HelixNet® is a networked partyline intercom with up to 24 channels and Program Audio over XLR, LAN or WAN.

# Description

The HelixNet Remote Station (HXII-RM, HRM-4X)\* is a 1RU 4-channel intercom user station with utility connections for Program Audio input and Stage Announce output, hosted by Arcadia® Central Station or HelixNet HMS-4X main station.

## **User Station**

The innovative front panel user station provides four keysets assignable to any intercom channel. The user station is provisioned with a headset connection, gooseneck mic connector and a loudspeaker in addition to All Call, Stage Announce, Remote Mic Kill and Program Audio level controls.

Expansion mode allows up to six remote stations (or HMS in non-Arcadia systems<sup>2</sup>) networked user stations to be combined, for a unified user station with up to 24 channels.

# **Local and Central Management Options**

HelixNet Remote Station can be added to an Arcadia or legacy HMS-4X without central configuration or interruption. Front panel keysets form unique waterfall menus allowing tactile device configuration and channel assignments.

Roles can be created and applied to one or multiple remote stationsremotely or locally. Roles can be edited locally or centrally managed from the Core Configuration Manager (CCM<sup>1</sup>).

## **Connectivity and Power Options**

HelixNet Remote Station connects to Arcadia Central Station or HelixNet HMS-4X main station with HLI-ET2 Ethernet module over network. Power can be supplied to the HelixNet Remote Station locally with a supplied power supply or Power over Ethernet (PoE) from 3rd party devices.

Alternatively, the HelixNet remote station can connect using XLR Powerline, with power or locally powered, to the Arcadia Central Station via HXII-DPL Powerline Device or to HelixNet HMS-4X main stations.

<sup>&</sup>lt;sup>1</sup>CCM and Endpoint network connection to legacy HMS-4X requires HLI-ET2

<sup>&</sup>lt;sup>2</sup>HMS-4X is not used in Arcadia hosted HelixNet Systems

<sup>&</sup>lt;sup>4</sup>HMS-4X is a legacy product

<sup>\*</sup>HXII-RM & HRM-4X are form, fit and functionally equivalent, differing in material and construction
