

BOSS VE5 VOCAL PROCESSOR A compact effects processor and looper for vocalists. It features effects derived from the VE-20 in a tabletop design that can be mounted on a mic stand with the included mount. Six high-quality effects include reverb, delay, double/harmony, dynamics, pitch correct and tone/SFX. The internal phrase looper can be used to record backing tracks. It has an XLR-1/4" combo input jack, XLR output jack, 1/4" TRS headphone jack and a 1/4" TRS aux input jack. Other features include an internal microphone, battery power ability and Favorite Sound function.

TC HELICON MIC MECHANIC VOCAL EFFECTS PROCESSOR

Studio quality vocal processing in a compact pedal format. Features 8 reverb and echo presets, as well as separate reverb and delay settings. It also has Auto Chromatic Pitch Correction, and a tone button for adaptive EQ, compression, de-essing and gating. A tap tempo foot-switch lets you easily match effects to the song's tempo and it can even be controlled by the optional MP-75 microphone. Easily connect to a PA system with XLR input and output. Other features include phantom power, a low-noise microphone preamp, USB connection for firmware updates and compact, rugged all-metal construction.

TC HELICON VOICE LIVE TOUCH 2 VOCAL PROCESSOR

A vocal processor with premium quality effects and VLOOP™ looper, it features the same effects as the VoiceLive 2. Using the 9-button Touch Matrix interface, change sounds in an instant with a tap or swipe of the smooth surface preset slider. Use the VLOOP's LoopAssist™ including metronome and quantization to overdub, undo, and multiply functions, creating up to 25 loops. Its 8 voices of NaturalPlay harmonies can be controlled by guitar, MIDI, USB/aux input or the embedded RoomSense mics, which listen to the music in the room to automatically set the key. Voicing buttons offer instant harmony arranging and a talk button bypasses all effects. Use "Favorites" to store and recall up to 25 customized effects. Other features include VocalCancel for karaoke, XLR mic input, 1/8" aux input, MIDI in (including MIDI sync support), 1/8" headphone output with level control, 1/4" guitar in and thru, XLR and dual TRS out, USB for audio I/O and connection to VoiceSupport software, mic stand mount and 1/4" input for a 3-button footswitch (sold separately).

TC HELICON VOICELIVE 2 VOCAL HARMONY AND EFFECTS PEDAL SYSTEM

A floor-based vocal processor with an easy-to-use, completely re-designed interface. Great for creative live performances. Features a "wizard" button to help you find the right preset quickly, stompbox access to 6 effect blocks, 1-button access to global tone, pitch, and guitar effects menus. Up to 8 voices with MIDI keyboard control or 4 doubled harmonies. Control harmonies with guitar, MIDI, or MP3 input. Has a new effects section that includes separate harmony, doubling blocks, reverb, and tap delay. Also has a special effects block for more extreme effects such as "T-Pain", megaphone and distortion. Global effects include tone, pitch correction, and guitar effects. Adaptive gate reduces mic input when you're not singing and use your feet for digital mic gain. All effects may be used simultaneously. I/O includes mic/line input with digital controlled mic gain, guitar input (with auto-mix, guitar FX, and transparent pass-thru), stereo 1/8" input, stereo XLR, 1/4", headphone outs, MIDI IN/OUT/THRU, and expression pedal in. It also offers simple preset chaining with the "step" feature and has USB support for updates, back-ups, and audio streaming.

TC HELICON VOICETONE SINGLES SERIES A series of vocal processing pedals offering effects ported from the VoiceLive2. The T1 is for adaptive tone and dynamics, the C1 offers HardTune™ and pitch correction. The D1 is used for doubling and detuning while the R1 offers reverbs tuned specifically for vocals. Up to 4 VoiceTone single pedals can be chained together for extensive processing possibilities. Each pedal features a studio quality microphone preamp with phantom power, balanced XLR output, recessed gain knob and USB for connecting to VoiceSupport for added tips, tricks and updates. The pedals have a die-cast steel design and rubberized base. The MP-75 microphone has a thumbswitch which allows you to turn effects on or off.
