REVOLABS SINGLE/DUAL CHANNEL HD WIRELESS MIC SYSTEMS

These systems use the same high definition audio, and DFS20™ technology found in the HD Executive series. They have some audio processing EQ and mixing capability, eliminating the need for external equipment in most cases. Each system ships with a charger base (1- or 2-mic charging docks) and a base station. Mics are purchased separately. The HD Single Channel System has an analog input and output (1/8" TRS), and the HD Dual Channel System has 2 of each, plus the ability to mix both outputs into one. All outputs can be line or mic level. This provides maximum flexibility to use the HD Single/Dual Channel System wherever a wired microphone can be used, making the system perfect for videoconferencing, voice lift and PA applications. Other features include 128-bit encryption, 2hr charge time, and 65' operating range.
